Recently an exhibition was held in our College on 31st January 2018. It was organized by NEEV, The official civil society of our college with kind support from Ms Maninder (HOD) Department of Civil Engineering and NEEV coordinator Ms Tarushi Singh. The exhibition was held to encourage and enlighten students about Civil Engineering and the works done by the professional in the field of civil engineering. The members of creative team working under NEEV took a keen interest and raised a very impressive show. The exhibition was held in the badminton court which was decorated by the members of NEEV.

Many innovative models were showcased by the NEEV society for the exhibition. These models include a working model describing the working of rotating bridge for connecting road, a railway route and passage for ships, Ancient London Bridge, Graceful Jawaharlal Nehru Stadium, Great Cloak tower, Captivating Signature Bridge, an attractive and innovative smart city, Traffic management was also shown in one such model and various other models. There were many models depicting the various kinds of concrete and their properties and uses. The creative team's hard work was well appreciated and supported by the faculty members of Civil Engineering Department which was possible only by their regular guidance and help. Students from different branch also enjoyed the exhibition and were delighted by the fascinating information they received about different construction materials and various ingenious models.

The exhibition lasted for about 2 hours and was attended by the Director of college Prof. (Dr) Sanjay Kumar and HODs and faculty members of different Departments. The Director and the other Faculty members were pleased with its success. The exhibition was a success in every way.
